

S3-Link Auto Export Salesforce Files Setup

We have a feature that auto-moves Salesforce files/attachments in Amazon S3 and attaches them with parent records. You will just have to enable that feature. Follow the below steps to enable the auto export Salesforce files/attachments feature.

1. Go to S3-Link Administration > File Export Configuration
2. Set File Export Configuration as per the attached screenshot

▼ Salesforce Attachments & Files

Auto Export Salesforce Files ?

Delete Salesforce Attachments & Files? ?

Export Closed Cases Attachments ?

Create S3-Link File for Salesforce File ?

Add Date in File Name ?

3. If you want to delete Salesforce Files once it is uploaded in Amazon S3, set **Delete Salesforce Attachments & Files** to true
